- Multi Till and Multi Site
- Proven Scalability
- Dynamic Reporting
- Streamlined Stock Control
- Fast Operation
- Tighter Security
- Customisable Button Images
- Greater Financial Visibility
- Real Time Management Data

Multi Buys & Meal Deals

TitanPOS includes a fully integrated multi buy tool, allowing various promotional discounts to be setup including:

- Last Item Discount
- Multi Discount
- Total Price
- Discount Amount

Meal Deals can also be setup to dynamically detect any product items in the basket and apply the deal price.

Shirt Printing

TitanPOS Retail includes a sports shirt printing feature, allowing the till operator to select any name and number to be printed onto the shirt, with a printed confirmation slip for the customer to sign. The sales price is then dynamically added to the basket and stock for the letters is adjusted accordingly.

Chip and Pin

TitanPOS includes multiple options for fully integrated Chip and Pin:

- YESPAY Easy-V
- Samport
- Barclaycard
- Global Pay
- Optomany

Advertising Screen Option

TitanPOS Retail includes the option to add an advertising screen to the back of the physical till. Images can then be placed into a central repository and a user defined timer then loops round the images displaying them in turn. The top section of the advert screen displays a virtual 2 line customer display and logos can be displayed either side of this.

Barcode & Shelf Edge Printing

The facility to print barcode labels is built into both the till and the backoffice applications. From the barcode print screen, new barcode numbers can be generated, barcodes and shelf edge labels can be scheduled or set to print immediately.

E-Commerce Option

Titan POS Commerce is an optional E-Commerce shopping cart solution which seamlessly links with the TitanPOS platform. Any orders placed online are automatically transferred to the Warehouse for picking, packing and shipping. The web management is performed via the standard TitanPOS BackOffice.
