TitanPOS Hospitality

The complete EPOS and Stock Management Solution

Introduction

TitanPOS Hospitality is a highly flexible and scalable Hospitality EPOS solution. Equally suitable for small and large clients alike. The software is packed with features for the modern Hospitality business.
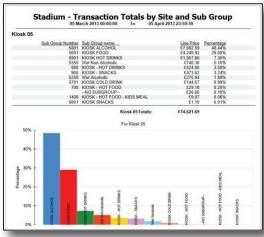

The software includes: Bar and Kitchen Printing, Real-time sales, Table service, Table Booking, Floating clerks, Loyalty, Cashless, Chip & Pin, Multibuys, Meal Deals, Time and Attendance, Full stock control, etc.

TitanPOS has been built against the industry standard Microsoft Windows platform and uses a Microsoft SQL data-base to provide your business with a truly world class and robust solution.

Even with all of these features, TitanPOS Kiosk is still easy to operate, so till operator training is effortless.

Back Office Stock Control & Reporting

TitanPOS includes full stock control allowing instant visibility of stock in each location across the business. Purchase ordering with stock minimums and automatic ordering plus stock adjusting are both built into the backoffice suite.

The system includes hundreds of easy to use reports designed so that you can make informed decisions and can get the right quantity of products at the right time. All reports can be run with any date and time range and can run from within a standard web browser.

Loyalty, Discounts & Cashless

TitanPOS includes a feature rich customer loyalty suite which includes the ability to handle cashless payments. Cashless payments can be made via proximity cards and e-money can be earned as a percentage of order spend.

Customer cards can be topped up at any till point or via our customisable web top-up portal.
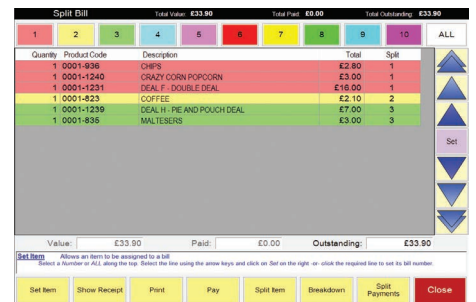

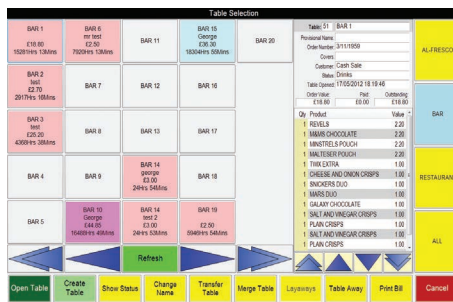

Each product can have loyalty points assigned to it, uniquely allocating points to customers purchasing specific items.

Alternatively points can be allocated as a percentage of total order spend. These points can then be redeemed as part payment against future purchases. Customer discounts can also be applied using one of the multiple customer discount levels.

Multi Buys & Meal Deals

TitanPOS includes a fully integrated multi buy tool, allowing various promotional discounts to be setup including:

- Last Item Discount
- Multi Discount
- Total Price
- Discount Amount

Meal Deals can also be setup to dynamically detect any product items in the basket and apply the deal price.

Chip and Pin

TitanPOS includes multiple options for fully integrated Chip and Pin:

- YESPAY Easy-V
- Samport
- Barclaycard
- Global Payments
- Optomany

Table Service

TitanPOS Hospitality includes a host of features for managing tables. The table selection screen provides easy access to open tables, clearly showing the status, name of the guest, the number of covers and the amount of time that the table has been open. From here bills can be viewed, printed, transferred, merged or simply opened.

Kitchen / Bar Printing

Multiple Kitchen and Bar printers can be attached to the system. Products can even be flagged for multiple printers if required.

Notes and instructions can also be added to the printouts. For example allergy information or other special requests.

Bill Splitting

TitanPOS Hospitality includes a bill splitting option. Bills can either be split equal ways or individual items can be selected via an intuitive selection screen. Products such as bottles of wine can even be spilt multiple ways and each bill can then be printed separately.

Time & Attendance

A feature rich Time and Attendance system is built into TitanPOS. Operators can swipe into the till to clock on and off. Thermal receipt slips can be printed for staff records and then full backoffice reports can be generated to calculate wages, etc. A stand alone application can display real time attendance activity i.e. who is clocked in and on a break, etc.
